

Wireless Temperature Detector User Manual

EN

Appearance

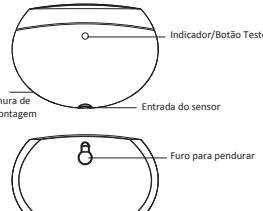

The detector adopts advanced wireless transmission and encoding technology, which can prevent signal interference. It supports low power consumption, low battery alarm, tampering alarm, and online report. It is mainly applied to bank, warehouse, building etc.

FR

Apparence

Le détecteur adopte une technologie sans fil avancée de transmission et d'encodage, capable d'émpêcher l'interférence de signal. Il prend en charge une faible consommation d'énergie, alarme de batterie faible, alarme anti-sabotage et rapport en ligne. Principalement destiné aux banques, entrepôts, bâtiments, etc.

PT

Apresentação

O detector utiliza uma tecnologia avançada de transmissão e codificação sem fio para impedir a interferência de sinal. Ele fornece baixo consumo de energia, alarme de bateria fraca, alarme de violação e relatórios on-line. É aplicado principalmente em bancos, armazéns, edifícios, etc.

This product and - if applicable - the supplied accessories too are marked with "CE" and comply therefore with the applicable harmonized European standards listed under the RE Directive 2014/53/EU, the RoHS Directive 2011/65/EU.

Quick Operation**Local Registration****Registration via APP**

- ① Log in to the APP Store and input "Hik-Connect" to search the mobile client.
- ② Download and install Hik-Connect to your phone.
- ③ After installing, tap to run the client.
- ④ Power on the security control panel.
- ⑤ Log in the Hik-Connect and tap the icon "+" at the upper-right corner of the Hik-Connect page to add the security control panel. You can scan the QR code on the device rear panel or on the package box, or input the device serial No. manually to add the device when the device is in the registration mode.
- ⑥ After adding the security control panel, tap thearming status icon on the right of the security control panel's name to enter the Partition page.
- ⑦ Tap the "+" icon on the Partition page to add the peripherals.

Installation**Product Usage****Probe mode selection**

Press the button shortly for 3 times to enter the application environment selection mode (at this time, the yellow indicator long light 1 second). Press the button to switch the selection mode (The default mode is mode 1 when power on. If the button is not pressed in 15 seconds, the yellow light will flash for 2 times, and the application environment selection mode will exit).

Mode 1

When switching to this mode, the green indicator flashes once: When Temperature is below 7 °C or above 35 °C for 35 seconds, the detector sends the alarm signal; When Temperature is below 8 °C or above 34 °C for 35 seconds, the detector sends the recovery signal.

Mode 2

This mode can be applied to icehouses or refrigerators. When switching to this mode, the green indicator flashes twice: When Temperature is below -10 °C for 35 seconds, the detector sends the alarm signal; When Temperature is below -11 °C for 35 seconds, the detector sends the recovery signal.

Mode 3

When switching to this mode, the green indicator flashes 3 times: When Temperature is below 7 °C or above 19 °C for 35 seconds, the detector sends the alarm signal; When Temperature is 8 °C to 18 °C for 35 seconds, the detector sends the recovery signal.

Mode 4

When switching to this mode, the green indicator flashes 5 times: When Temperature is below 19 °C or above 35 °C for 35 seconds, the detector sends the alarm signal; When Temperature is 20 °C to 34 °C for 35 seconds, the detector sends the recovery signal.

Specification

Wireless Temperature Detector	
RF Frequency	433 MHz
RF Modulation	FSK
RF Transmission Distance	300 m (Open Area)
Transmission Power	≤ 10 dBm
Low Battery Alarm	2.5 V ± 0.2 V
Alarm Current	≤ 30 mA
Battery	3 V, CR2450
Tamper-proof	Supported
Temperature	-10 °C to +55 °C
Humidity	≤ 95% RH
Weight	61.5 g
Dimension(L*W*H)	73 mm * 52 mm * 21 mm
Installation	Wall Mounting

Fault alarm: When the probe is pulled out, the sensor will send a fault alarm signal and the red light will flash once.

Fonctionnement rapide**Inscription locale****Inscription**

Accéder au mode inscription sur le panneau de commandes de sécurité. Démontez le détecteur et ajoutez le détecteur en suivant l'invite vocale.

Désinscription

Accéder au mode désinscription sur le panneau de commandes de sécurité. Démontez le détecteur et dissociez le détecteur en suivant l'invite vocale.

Remarque :

La distance entre le panneau de commandes de sécurité et le détecteur doit être inférieure à 50 cm.

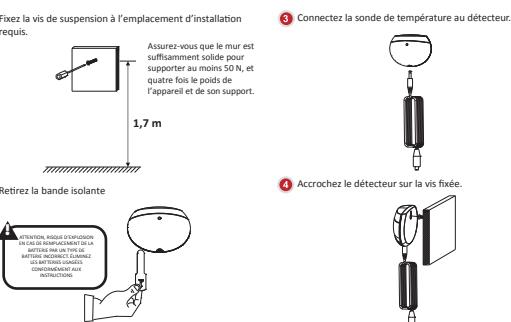

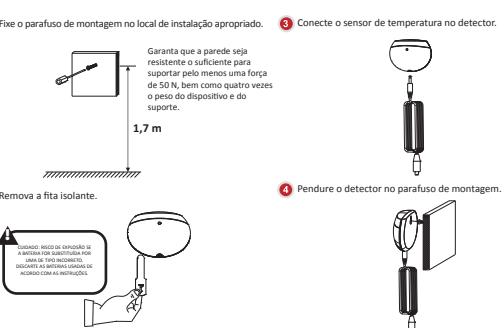

Formatage**Détecteur éteint.**

maintenez enfoncé le bouton de test pendant 3 secondes et allumez l'appareil en même temps.

Après 5 s, le voyant vert clignotera 3 fois, indiquant que le formatage est terminé.

Inscription via l'application

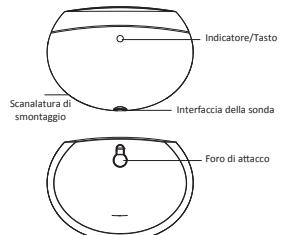

- ① Connectez-vous à l'App Store et saisissez « Hik-Connect » pour rechercher le client mobile.
- ② Téléchargez et installez Hik-Connect sur votre téléphone.
- ③ Après l'installation, appuyez sur pour exécuter le client.
- ④ Allumez le panneau de commandes de sécurité.
- ⑤ Connectez-vous à Hik-Connect et appuyez sur l'icône « + » dans le coin supérieur droit de la page Hik-Connect pour ajouter le panneau de commandes de sécurité. Vous pouvez scanner le QR code sur la paroi arrière de l'appareil ou sur la boîte de l'appareil, ou saisir manuellement le numéro de série de l'appareil pour ajouter l'appareil lorsque l'appareil est en mode inscription.
- ⑥ Après avoir ajouté le panneau de commandes de sécurité, appuyez sur l'icône d'état d'armement à droite du nom du panneau de commandes de sécurité pour accéder à la page Partition.
- ⑦ Appuyez sur l'icône « + » dans la page Partition pour ajouter les périphériques.

Installation**Instalação****Spécification**

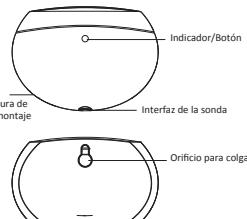

Capteur de température sans fil	
Fréquence RF	433 MHz
Modulation RF	FSK
Distance de transmission RF	300 m (espace dégagé)
Puissance de transmission	≤ 10 dBm
Alarme de batterie faible	≤ 30 mA
Batterie	3 V, CR2450
Antisabotage	Pris en charge
Température	-10 °C à +55 °C
Humidité	≤ 95% HR
Poids	61.5 g
Dimensions (L*W*H)	73 mm * 52 mm * 21 mm
Installation	Montage mural

Especificações

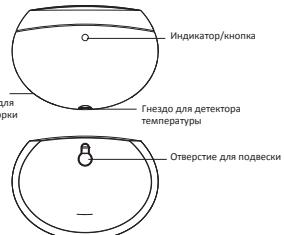

Detector de temperatura sem fio	
Frequência RF	433 MHz
Modulação de RF	FSK
Distância de transmissão de RF	300 m (em espaço aberto)
Potência de transmissão	≤ 10 dBm
Alarme de bateria fraca	2,5 V ± 0,2 V
Corrente do alarme	≤ 30 mA
Bateria	3 V, CR2450
Antiviolação	Suportado
Temperatura	-10 °C a +55 °C
Umidade	≤ 95% UR
Peso	61,5 g
Dimensões (C x L x A)	73 x 52 x 21 mm
Instalação	Supporte de parede

Il rilevatore fa uso di avanzate tecniche di trasmissione e codifica wireless, che prevedono le interferenze tra segnali. Il dispositivo è dotato di bassi consumi di energia, allarme di batteria scarica, allarme di manomissione e segnalazione online. È ideale per l'uso in ambienti quali banche, magazzini, edifici, ecc.

El detector cuenta con tecnología de transmisión inalámbrica y codificación avanzada que puede prevenir interferencias de señal. Dispone de funciones de bajo consumo de energía, alarma de batería baja, alarma de sabotaje e informes en línea. Se utiliza principalmente en bancos, almacenes, construcciones, etc.

Этот датчик разработан на базе передовой технологии кодирования и беспроводной передачи данных, которая обеспечивает надежную защиту сигнала от помех. Датчик отличается низким энергопотреблением. Он сигнализирует о разряде батареи и попытках взлома, передавая сигналы в режиме онлайн. Этот датчик предназначен в основном для использования в банках, жилых домах, складских помещениях и т. д.

Utilizzo rapido

Registrazione locale

Registrazione

Entrare in modalità registrazione del pannello di controllo di sicurezza. Attivare il rilevatore e aggiungerlo in base alle indicazioni del messaggio vocale.

Annullamento registrazione

Entrare in modalità annullamento registrazione del pannello di controllo di sicurezza. Attivare il rilevatore e rimuovere il rilevatore in base alle indicazioni del messaggio vocale.

Nota: La distanza tra il pannello di controllo di sicurezza e il rilevatore deve essere meno di 50 cm.

Formattazione

Spegnere il rilevatore.

Tenere premuto il pulsante reset per 3 secondi e allo stesso tempo accendere il rilevatore.

Dopo 5 secondi, l'indicatore verde lampeggi 5 volte, a indicare che la formattazione è completa.

Registrazione tramite APP

① Accedere all'APP Store e inserire "Hik-Connect" per effettuare la ricerca del client mobile.

② Scaricare e installare Hik-Connect sul telefono.

③ Dopo l'installazione, toccare per avviare il client.

④ Accendere il pannello di controllo di sicurezza.

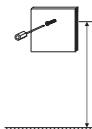

⑤ Accedere a Hik-Connect e toccare l'icona "+" nell'angolo in alto a destra della pagina di Hik-Connect per aggiungere il pannello di controllo di sicurezza. È possibile aggiungere il dispositivo quando è in modalità di registrazione, effettuando la scansione del codice QR situato sul pannello posteriore del dispositivo o sulla scatola della confezione, o inserendo manualmente il numero di serie del dispositivo.

⑥ Dopo aver aggiunto il pannello di controllo di sicurezza, toccare l'Icona dello stato di inserimento, situata a destra del nome del pannello di controllo, per accedere alla pagina Partizioni.

⑦ Toccare l'Icona "+" sulla pagina delle Partizioni per aggiungere le periferiche.

Installazione

① Fissare la vite di sostegno nella posizione di installazione richiesta.

Assicurarsi che la parete sia robusta abbastanza da resistere all'applicazione di forze inferiori a 50 N, e di non appesantire la parete per più di quattro volte quello di dispositivo e staffa.

② Rimuovere la striscia isolante.

AVVERTENZA: RISCHIO DI ESPLOSIONE E DI SUSTINERE LA MORTE. NON USARE CON UNA TIPO DI BATTERIA CON UNA DI TIPO INCORRECTO. LEGGERE LE INFORMAZIONI SU CAVI EISTRUZIONI.

③ Collegare la sonda di temperatura al rilevatore.

④ Applicare il rilevatore sulla vite fissata.

Specifiche

Rilevatore wireless di temperatura	
Frequenza RF	433 MHz
Modulazione RF	FSK
Distanza di trasmissione RF	300 m (Spazi aperti)
Potenza di trasmissione	≤10 dBm
Allarme di batteria scarica	2,5 V±0,2 V
Assorbimento con allarme	≤30 mA
Batteria	3 V, CR2450
Anti-manomissione	Supportato
Temperatura	Da -10 °C a +55 °C
Umidità	≤ 95 % Umidità relativa
Peso	61,5 g
Dimensioni (L * P * A)	73 mm x 52 mm x 21 mm
Installazione	Montaggio a parete

Funcionamiento rápido

Registro local

Registro

Asegúrese de que el panel de control de seguridad acceda al modo de registro. Dispare el detector y añádalo siguiendo las indicaciones acústicas.

Cancelación del registro

Asegúrese de que el panel de control de seguridad acceda al modo de cancelación de registro. Dispare el detector y elimínelo siguiendo las indicaciones acústicas.

Nota: La distancia entre el panel de control de seguridad y el detector debe ser menor de 50 cm.

Formato

Apague el detector.

Mantenga pulsado el botón de restablecimiento y encienda el detector al mismo tiempo.

Al cabo de 5 s, el indicador verde parpadeará 3 veces indicando que el formato está completo.

Registro a través de la aplicación

① Inicie sesión en la App Store y escriba "Hik-Connect" para buscar el cliente móvil.

② Descargue e instale Hik-Connect en su teléfono.

③ Después de instalarlo, toque para ejecutar el cliente.

④ Encienda el panel de control de seguridad.

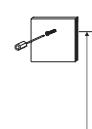

⑤ Inicie sesión en Hik-Connect y toque el icono "+" en la esquina superior derecha de la página de Hik-Connect para añadir el panel de control de seguridad. Puede escanear el código QR del panel trasero del dispositivo o del embalaje, o introducir manualmente el número de serie del dispositivo para añadirlo en modo de registro.

⑥ Después de añadir el panel de control de seguridad, toque el icono de estado de armado a la derecha del nombre del panel de control de seguridad para acceder a la página de Partición.

⑦ Toque el icono "+" de la página de Partición para añadir los periféricos.

Instalación

① Fije el tornillo para colgar en el lugar de instalación requerido.

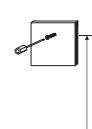

Compruebe que la pared sea lo suficientemente fuerte para soportar al menos 50 N, además de cuatro veces el peso del dispositivo y el soporte.

② Retire la tira aislante.

Установка

① Закрутите шурп для подвески датчика в требуемом месте.

Убедитесь, что стена достаточно прочная, чтобы выдержать вес не менее 5 кг, а также четырехкратный вес датчика и его основания.

② Извлеките изоляционную прокладку.

③ Подключите датчик температуры к датчику.

Технические данные

Беспроводной датчик температуры	
Частота радиоканала	433 МГц
Радиочастотная модуляция	FSK
Дальность передачи радиочастотного сигнала	300 м (на открытом пространстве)
Мощность передатчика	≤ 10 дБм
Сигнализация разряда батареи	2,5 ± 0,2 В
Ток при срабатывании сигнализации	< 30 мА
Батарея	3 В, CR2450
Защита от взлома	Поддерживается
Температура	от -10°C до +55°C
Влажность	≤ 95 % относит.
Масса	61,5 г
Размеры (Д x Ш x В)	73 x 52 x 21 мм
Установка	Настенный монтаж
