How to Add Tag in AX PRO Wireless Control Panel

Preparation

1. DS-PWA Series AX PRO Wireless Security Control Panel
2. Wireless Tag DS-PT-MF or normal Mifare card
3. IE Browser and Hik-Connect App

How to Configure Add Tag in AX PRO Wireless Control Panel

After adding cards/tags to the wireless AX PRO, you can swipe the card/tag to arm or disarm all the detectors added to specific area(s) of the AX PRO, and silence alarms.

Note: DS-PWA96 Series(support Max 48 Tags) have built-in Tag Reader，DS-PWA64 Series(support Max 32 Tags) need to connect Wireless Tag Reader(DS-PT1-W) to support this function.

1. Add the Tag to AX PRO with Hik-Connect

1) Enter the site, tap the AX PRO and then log in to the device.
2) Tap 🔘 → User Management → Card/Tag to enter the Tag Management page.
3) Tap ➕ add a Tag.
4) When hearing the voice prompt "Swipe Tag", you should present the Tag on the AX PRO Tag presenting area.
   ● When hearing a beep sound, the Tag is recognized.
   ● The Tag will be displayed on the Tag page.
5) Tap Edit Icon to edit the Tag name
6) Slide Enable Tag
7) Select a linked user
8) Select the Tag type

Note:

● If you log in as an installer, skip this step 5). Editing Tag name is only available to administrator.

● The name should contain 1 to 32 characters.

● Different linked users have different Tag permissions.

Tag Type：

Operation Tag：You can swipe the Tag to arm or disarm.

Patrol Tag：When you swipe the Tag, the system will upload a record (Not arm/disarm).
