2) Register Sub Door Station to Door station on Main Door Station Remote

Configuration interface

 Go to Device Management → Add, set the Device Type as Sub Door Station, fill in the necessary info of the device, The registration password is the password that must be configured for the activated device. When the door station adds an activated sub-door station, the registration password of the sub-door station must be known. The inactive sub-door station can be directly assigned by door station. The port is 8000.
