### 2. Register Indoor Station to Door station on Door Station Remote

#### **Configuration interface**

 Then go to Device Management → Add, set the Device Type as Indoor Station, fill in the necessary info of the device.

**Note:** The **password** is the device's password, if the device is inactive, set a new password in this page. The **registration password** is the password that must be configured for the activated device. When the door station adds an activated indoor station, the registration password of the indoor station must be known. The inactive indoor station registration password can be directly assigned by door station. You can set one at will. The **Port** is 8000.
