DA-JB4700

Junction Box

ALUMINUM JUNCTION BOX FOR DOME CAMERA INSTALLATION

The DA-JB4700 is a dedicated junction box designed to support cable management and secure installation of dome cameras. Constructed from aluminum, it maintains durability in outdoor environments, while the white finish provides a clean appearance that blends seamlessly into various installation settings. Its compact design of Ø147 x 60.5mm optimizes space utilization, and the lightweight structure of 0.68kg enhances installation efficiency. Compatible with separate mounting accessories, it enables flexible configuration based on deployment requirements.
